

UNIVERSITY OF  
CAMBRIDGE

- **Section 1:** Comprehensive review of the causes of psychosis.  
*Primary and secondary psychosis. Iterative search; >220 disorders plus many drugs/toxins.*

- **Section 2:** Approaches to diagnosis; aides-mémoire.  
*Basic clinical approach; probe questions; exclusion of medical emergencies; symptom/sign types seen in different psychotogenic disorders; which special investigation when; classificatory approach and diagnostic criteria for primary psychoses.*

- Clinical emphasis.
- External memory (>100,000 words, >1,300 sources): useful for us in practice.
- *Declaration of interest: we share £2.80/copy.*
