UK ONLY IMPORTANT PLEASE READ CAREFULLY

The wires in this mains lead are coloured in accordance with the following code.

BLUE-NEUTRAL BROWN-LIVE (OR ACTIVE)

As the colours of the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug
— PROCEED AS FOLLOWS: The earth plug pin is unnecessary. As the Machine is designed under double insulation structure, the
earth wire is removed from the machine. The wire coloured BROWN must be connected to the terminal marked L or A or coloured RED.
The wire coloured BLUE must be connected to the terminal marked N or coloured BLACK. Neither core is to be connected to the earth
terminal of a three-pin plug.

IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic safety precautions should always be followed, including the following:

Read all instructions before using (this appliance).

DANGER — To reduce the risk of electric shock:

An appliance should never be left unattended when plugged in. Always unplug this appliance from the electric outlet immediately
after using and before cleaning.

WARNING — To reduce the risk of burns, fire, electric shock, or injury to persons:

1. Do not allow to be used as a toy. Close attention is necessary when this appliance is used by or near children.
2. Use this appliance only for its intended use as described in this manual. Use only attachments recommended by the manufacturer
as contained in this manual.
3. Never operate this appliance if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or
dropped into water. Return the appliance to the nearest authorized dealer or service center for examination, repair, electrical or
mechanical adjustment.
4. Never operate the appliance with any air openings blocked. Keep ventilation openings of the sewing machine and foot controller
free from the accumulation of lint, dust, and loose cloth.
5. Never drop or insert any object into any opening.
6. Do not use outdoors.
7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
8. To disconnect, turn all controls to the off ("O") position, then remove plug from outlet.
9. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
10. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience
and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

DANGER

1. Always unplug before removing. Replace the bulb with same type rated 15 watts.
2. Do not reach for an appliance that has fallen into water. Unplug immediately.
3. Do not place or store appliance where it can fall or be pulled into a tub or sink. Do not place or drop into water or other liquid.
WARNING
1. Keep fingers away from all moving parts. Special care is required around the sewing machine needle.
2. Always use proper needle plate. The wrong plate can cause the needle to break.
3. Do not use bent needles.
4. Do not pull or push fabric while stitching. It may deflect the needle causing it to break.
5. Switch the sewing machine off ("O") when making any adjustments in the needle area, such as threading needle, changing needle, threading bobbin, or changing presser foot, etc.
6. Always unplug sewing machine from the electrical outlet when removing covers, lubricating, or when making any other user servicing adjustments mentioned in the instruction manual.
7. Never operate on a soft surface such as a bed or couch where the air openings may be blocked.

ESSENTIAL PARTS

Names of Parts

- Spool Pins
- Bobbin Winder Stopper
- Bobbin Winder Spindle
- Bobbin Winder Thread guide
- Front cover
- Reverse Stitch Bottom
- Take up lever
- Face Plate
- Needle Plate
- Hook Cover
- Extension Table (Accessory storage box)
- Balance Wheel Screw
- Stitch Selector
- Upper thread tension dial
- Stitch Length control knob
- Cord Socket
- Presser Foot lever
- Free Arm
- Needle Clamp Screw
- Back Cover
GETTING READY TO SEW

Connecting the Machine to the Power Supply

Before connecting the power, make sure the voltage and frequency of your electrical power conform to the machine.

Fit the nonreversible plug into the cord socket and plug the machine into the power supply.

Foot Control

Sewing speed can be varied by the foot control. The harder you press on the control, the faster the machine runs.

Sewing Light

The sewing light is located behind the face plate. Turn the screw counter-clockwise and remove the face plate.

(A)

- To remove . . . . Turn to the left.
- To replace . . . . Turn to the right.
Extension Table (Accessory Storage Box)

Extension Table
The extension table provides added sewing surface and can be easily removed for free arm sewing.

For free arm sewing

Pull the end of the extension table away from the machine, as illustrated.

For attaching the table

Push the extension table until its lugs fit into the machine.

To Snap On and Snap Off the Presser Foot

To snap off

Turn the balance wheel toward you to raise the needle to its highest position. Raise the presser foot.

Press the lever on the back of the foot holder. The presser foot will drop off.

To snap on

Place the presser foot so the pin on the foot lies just under the groove of the foot holder. Lower the foot holder to lock the foot in place.
### Changing Needles

- Raise the needle by turning the balance wheel toward you and lower the presser foot.

### Thread and Needle Chart

</table>

- Check your needles frequently for barbed or blunted points. Snaps and runs in knits, fine silks and silk-like fabrics are permanent and are almost always caused by a damaged needle.

- Switch off the machine and disconnect the machine from the power point.
- Loosen the needle clamp screw by turning it counter-clockwise.
- Remove the needle from the clamp.
- Insert the new needle into the needle clamp with the flat side away from you.
- When inserting the needle into the clamp, push it up as far as it will go and tighten the clamp screw firmly with the screwdriver. Thread the needle.
- Reconnect the machine to the power point, switch on the machine and continue to sew.
Setting Spool Pins

To use pull up the spool pin. Push down for storage.
If the thread would slip down from the spool, thread through the hole of spool pin as shown.

Removing or Inserting the Bobbin Case
Open the hook cover.
Raise the needle by turning the balance wheel toward you.
Take out the bobbin case by holding the latch.
When inserting the bobbin case, place the horn into the recess of the hook race.
Switch on the machine.

Switch off the machine while doing this.

Winding the Bobbin

Cross the cotton in a figure of eight for good tension.
Draw thread from spool. Guide the thread around the bobbin winder thread guide.
Insert the thread through one of the holes in the bobbin from the inside to the outside.
Put the bobbin on the bobbin winder spindle, and push it to the right.
With the free end of the thread held in your hand, depress the foot control. Stop the machine when it has made a few turns, and cut the thread close to the hole in the bobbin. Depress the foot control again.
When the bobbin is fully wound, it will be stop automatically.
Return the bobbin winder to its original position by moving the spindle to the left, and cut the thread.
Threading Bobbin Case

1. Place bobbin into bobbin case. Make sure the thread unwinds in the direction of arrow.
2. Pull the thread into the bobbin case slot.
3. Draw the thread under the tension spring and into the delivery eye.
   * Leave about 10 cm (4 inches) of free thread.

Threading the Machine
Always thread your machine with the power off

1. Raise take-up lever to its highest position by turning balance wheel toward you.
2. Raise presser foot.
3. Place spool on spool pin as shown, with thread coming from the back of the spool.
4. Draw thread into thread guide using both hands.
5. While holding thread near spool, draw thread down into the tension area and then around the check spring holder.
6. Firmly draw thread up and through take-up lever from right to left.
7. Draw thread down and slip it into needle bar thread guide.
8. Thread needle eye from front to back.

NOTE: You may want to cut the end of thread with a pair of sharp scissors for easier insertion.

Switch on the power after threading the machine and bobbin. You are now ready to sew.
**Drawing up Bobbin Thread**

1. Raise presser foot and hold the needle thread lightly with your left hand.

2. Turn the balance wheel slowly towards you with your right hand until the needle goes down and continue turning balance wheel until the take-up lever is at its highest position. Lightly draw up the needle thread forming a loop of the bobbin thread.

3. Pull 15 cm (6") of both threads back and under the presser foot.

---

**Balancing Needle Thread Tension**

- **Setting mark**
  - **Loosen**
  - **Tighten**

- **The needle thread is too tight.**
  - Loosen the needle thread tension by moving the dial to a lower number.

- **The needle thread is too loose.**
  - Tighten the needle thread tension by moving the dial to a higher number.

The needle thread and the bobbin thread should interlock in the center of two layers of fabric in straight stitch seams.

---

**Thread Tension for Zigzag Sewing**

To obtain better zigzag stitches, the upper tension should be slightly lower than in the case of straight sewing. The upper thread should appear slightly on the reverse side of the fabric.
**Stitch Selector**

The stitch selector not only determines the stitch you select, but also regulates the stitch width for regular zigzag and rick rack stretch stitches.

**NOTE:** To avoid needle or fabric damage, be sure your needle is up and out of the fabric when adjusting this control.

---

**Stitch Length Control Knob**

The stitch length control regulates the length of stitch, and also has a stretch stitches setting.

The higher the number, the longer the stitch.

'0' means no feed.

Depending upon your fabric or your own preference in buttonholes, you may alter the buttonhole stitch density within the buttonhole range (□) on the stitch length control.
Adjusting Stretch Stitch Balance

To select Stretch Stitches, set this control at SS position.
In stretch stitch sewing, Stitch Length Control should be in the Center position between ± SS (SSposition) for most materials. Depending upon the type of fabric used, you may need to adjust this control to match forward stitches of stretch sewing with reverse motion stitches.
To shorten stretch stitches, turn the control slightly toward "-". To lengthen, turn toward "+"

Reverse Stitch Control

As long as you keep the reverse stitch control depressed, the machine sews backwards.

Darning Plate

To put on the Darning Plate:
1. Position the darning plate with the 3 pins on the bottom.
2. Fit the darning plate pins into the needle plate holes. The feed dogs will show through the darning plate holes.

Left Needle Position

Use Left Needle Position for more control while topstitching or edge stitching difficult fabrics.

NOTE: Use only zigzag presser foot for Left Needle Sewing.
**Straight Stitch Sewing**

- **Machine Setting**
  - Stitch selector
  - Stitch length control knob
  - Upper thread tension dial 2 to 6

- **Stitch**
  - Zigzag foot

- **Raise the presser foot** and position the fabric under the presser foot.

- **Lower the presser foot** and smooth the threads toward the back. Depress the foot control.

- Gently guide the fabric letting the fabric feed by itself.

---

**BASIC SEWING**

- Make sure the take-up lever is at the highest position before starting.

- For fastening the ends of seams, press the reverse stitch control and sew several reverse stitches.

- Raise the presser foot and remove the fabric, drawing the threads to the back.

- **If the fabric won’t release turn the hand wheel towards you to complete the stitch, and gently pull out material.**

---

**To Change the Sewing Directions**

- Stop the machine and turn the balance wheel toward you to bring the needle down into the fabric.

- Raise the presser foot.

- Pivot the fabric around the needle to change sewing direction as desired. Lower the presser foot and continue sewing.

---

**Zigzag Stitching**

- **Machine Setting**
  - Stitch selector
  - Stitch length control knob

- Upper thread tension dial 2 to 5

- **Simple zigzag stitching** is widely used for overcasting, sewing on buttons etc.
UTILITY STITCHING

Overcasting

Machine Setting
Stitch selector
Upper thread tension dial 1 to 4
Stitch length control knob 1 to 2
Zigzag foot

This type of stitch is used on the seam allowance to prevent fabrics from fraying at raw edges.

Overedge Stitch

Machine Setting
Stitch selector
Upper thread tension dial 1 to 4
Stitch length control knob
Zigzag foot

Overedge stitch will be done most successfully when the right side stitches of zigzag fall slightly off the edges of the fabrics.

Tricot Stitch

Machine Setting
Stitch selector
Upper thread tension dial 1 to 4
Stitch length control knob 1 to 2
Zigzag foot

Place the fabric under the presser foot so that the edge will be slightly inside the right hand side of the presser foot. Guide the work so the right hand stitches fall at the edge of the fabric.

Triple Strength Stitch

Machine Setting
Stitch selector
Upper thread tension dial 2 to 6
Stitch length control knob
Zigzag foot

The stitch is sewn with two stitches forward and one stitch backward forming a seam that does not rip easily.
Garments should be basted for fitting before seaming.
**Zipper Application**

- **Machine Setting**
  - Stitch: Stitch selector
  - Upper thread tension dial 3 to 6
  - Stitch length control knob 2

Pin or baste zipper tape to fabric and place it under the foot.

Smooth the threads toward the back and lower the foot. To sew left side of the zipper, guide the edge of the zipper along the zipper teeth and stitch through garment and zipper tape.

Turn the fabric and sew the other side of the zipper in the same way as you did on the left side of the zipper.

**Sew 3 or 4 stitches while holding the needle and bobbin threads.**

**Rolled Hem**

- **Machine Setting**
  - Stitch: Stitch selector
  - Upper thread tension dial 2 to 6
  - Stitch length control knob 1.5 to 2

Make a double 0.25 cm (1/8") fold approximately 8 cm (3") in length.

**Lower the needle into the fabric at the point where sewing is to begin, then lower the hemmer foot.**

**Sew 3 or 4 stitches while holding the needle and bobbin threads.**

**Insert the folded portion of the fabric into the curl of the hemmer foot.**

**Lower the hemmer foot, then sew by lifting up the edge of the fabric to keep it feeding smoothly and evenly.**

**Trim about 0.7 cm (1/4") from corners as illustrated, to reduce bulk.**
Sewing Buttons

Machine Setting

Stitch selector

Zig Zag foot

Upper thread tension dial 1 to 4

Stitch length control knob any number (not necessary to adjust)

Darning plate

Use the darning plate for button sewing. (See page 10.)

A pin can be placed on top of the button to form a shank. Set the stitch selector at "D". Align both holes of the button with the slot of the foot and place the left hole of the button just below the needle point. Lower the foot and turn the pattern selector until the needle point comes just above the right hole of the button. Sew about five stitches and raise needle. Set the stitch selector at "D" again and sew a few stitches to lock thread.

To strengthen the shank, cut the threads leaving a 20 cm (8") tail. Bring the needle thread down through the hole in the button and wind it around the shank. Draw the thread to the wrong side and knot.
Buttonhole Stitching

Make a test buttonhole and a sample duplicating the fabric, interfacing and seams of the actual garment. Place the button on the fabric sample and mark the top and bottom to determine the buttonhole length.

1. Set the stitch selector at "." Slide both threads to the left. Lower the needle into the garment where the buttonhole is to start, and lower the foot.

2. Sew down the left side stopping at the bottom mark. Raise the needle.

3. Set the stitch selector at "." Sew 5 stitches of bartack and raise the needle up from the fabric.

4. Set the stitch selector at "." Sew up the right side of the buttonhole. Stop the machine when you are directly opposite the first stitch on the left hand side and raise the needle.

5. Set the stitch selector at "." Sew 5 bartacks stitches and raise the needle up from the fabric. Set the stitch length control to "0" and the stitch selector at straight stitch sewing. Sew a few locking stitches.

6. Remove the fabric from the machine and cut the sewing threads. Insert a pin inside the bartack. Then cut the opening with a seam ripper. Take care not to cut the stitches.
Shell Tuck

DECORATIVE STITCHING

Place the folded edge along the slot of foot. The needle should fall off the edge of the fabric, on the right forming a tuck.

Stretch Stitch Patterns

When forward and reverse feeds become unbalanced depending upon the type of fabric, correct the balance by turning the stitch length control as follows:

When patterns are compressed, correct it by turning the dial toward “+”. (See page 10)

When patterns are drawn out, correct it by turning the dial toward “−”. (See page 10)
When caring for your machine, or cleaning it, unthread it and disconnect the power, even when you change the needle.

Dismantling and Assembling Hook Race

To dismantle hook race:
Raise the needle to its highest position and open the hook cover. Open the hinged latch of bobbin case and take it out of the machine.

CARE OF YOUR MACHINE

Open the hook race ring holders and remove the hook race ring.

Disconnect your machine from the power source

Oil with one drop of oil.

Remove the hook.

* Clean the hook race with a brush and a soft dry cloth.

Cleaning the Feed Dogs

Fitted in the machine.

Remove the needle and the presser foot.
Unscrew the needle plate set screws and remove the needle plate.

With a brush, clean out dust and lint clogging on the feed dog teeth.
Replace the needle plate. Tighten screws.

To assemble hook race:
Hold the hook by the center pin and fit it carefully back into the hook race, forming a perfect circle with the shuttle driver. Attach the hook race ring making sure bottom pin fits into the notch. Lock the hook race ring by turning the holders back into position. Insert the bobbin case. Thread the machine and bobbin, connect the machine to the power point and sew switching on the power.

NOTE: It is easier if you lay the machine on its back to replace the race.
## Trouble Shooting

3. The needle and/or threads are not suitable for the work being sewn. | See Page 5  
See Page 6  
See Page 6 | The buttonhole stitches are not balanced. | 1. Stitch length is not suitable for the fabric being sewn.  
2. The work is being pulled or held back. | See Page 9  
Do not force the fabric too tightly. |
### Environment

**Meaning of crossed out wheeled dustbin:**

Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities.

Contact your local government for information regarding the collection systems available.

If electrical appliances are disposed of in landfills or dumps, hazardous substances can leak into the groundwater and get into the food chain, damaging your health and well-being.

When replacing old appliances with new ones, the retailer is legally obligated to take back your old appliance for disposals for disposal.

19
Meaning of crossed out wheeled dustbin:

Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities.

Contact your local government for information regarding the collection systems available.

If electrical appliances are disposed of in landfills or dumps, hazardous substances can leak into the groundwater and get into the food chain, damaging your health and well-being.

When replacing old appliances with new ones, the retailer is legally obligated to take back your old appliance for disposals at least free of charge.

This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
